Education**

- Pre-School Institution SVE
- Elementary School Phase
- Grammar School Phase
- Vocational School Phase
- Partner Classes

Adolf-Rebl School

provides education and support for intellectually disabled children and young people aged 6 to 21. Our aim is to prepare our students for life with a disability giving them the skills to achieve their full potential and social integration.

Pre-School Institution

provides individual care and training for children with considerable developmental delays and various disabilities from the age of 3 years on. Group size is 7 to 9 children.

Catchment area of our institution is the Pfaffenhofen district. School attendance and transport to school are free of charge. We also provide education and training for children with increased requirements for care.

Students learn for Life

In developing their perception, speech, cognition and practical skills intellectually disabled children and young people require individual support and training.

Our students receive tuition and education to prepare them for an independent life and to develop their personalities.

Emphasis is therefore put on practical training as well as education in reading, writing and mathematics. Project weeks, seasonal feasts and celebrations and school field trips add to our school life.

Our school is designed to be an inspiring place for students to learn and to develop.

Our school cooperates closely with the curative pedagogical day care center to ensure the best all-day individual tuition and education for every child.

Special Education Provided

Classes of 8 to 12 students enable us to provide education, tuition and support for each student according to his/her skills and needs individually.

We provide

- Training and education in school classes as well as small, skill-oriented tutoring groups
- Visualization and Structuring (TEACCH)
- Special and individual measures for children with severe and / or multiple disabilities
- Communicative competence training via augmentative and alternative communication
- Various elective subjects during afternoon classes
- Special support and training with a therapy buddy dog

Inclusion by Cooperation with regular schools in our local district

Two of our school classes are not taught on the premises. They are partner classes at Montessori School and Secondary School in Pfaffenhofen respectively. This enables our students to improve their social skills and interaction and to receive learning incentives. Special emphasis is put on Montessori's educational intentions. Moreover, joint projects of individual classes with classes at regular schools are organised on a
